

Inari-LEARN

Course Directors

Andrew Niekamp, MD

Executive Chair | VP Medical Affairs, Inari Medical

Prior to joining Inari, Dr. Niekamp was a Vascular Interventional Radiologist with Radiology Associates of South Florida and practiced at Baptist Hospital of Miami, South Miami Hospital and Doctors Hospital. Dr. Niekamp received his undergraduate degree and medical degree from The Ohio State University and completed his post-graduate training at the University of Texas at Houston/M.D. Anderson Cancer Center. He completed his fellowship in Vascular Interventional Radiology at the Miami Cardiac and Vascular Institute. Following fellowship, he joined the faculty at Miami Cardiac and Vascular Institute and was a practicing attending until March 2024.

Steven Abramowitz, MD

Vascular Surgery | MedStar Washington Hospital Center

Dr. Abramowitz is a board-certified vascular surgeon at the MedStar Heart & Vascular Institute, faculty at the Georgetown University School of Medicine and a member of the Society for Vascular Surgery. As a vascular surgeon, he specializes in the treatment of venous occlusive disease, carotid artery disease, and peripheral arterial disease. His research interests include endovenectomy techniques, post-thrombotic syndrome and venous stasis ulceration.

Michael Jolly, MD

Interventional Cardiology | OhioHealth Methodist Hospital

Michael A. Jolly, MD, FACC is a practicing Interventional Cardiologist in Columbus, Ohio. Originally hailing from Austin, Texas, Dr. Jolly graduated from the University of Texas Southwestern Medical School at Dallas in 2004 and then completed a residency and chief residency in Internal Medicine at the University of Texas Southwestern/Parkland Hospital in Dallas, Texas.

He then completed his Cardiology and Interventional Cardiology fellowships at the Cleveland Clinic where he received advanced training in complex coronary, structural heart, and peripheral vascular interventions.

“Providing a more structured framework for resident/fellow education, especially for complex venous disease, is incredibly important because formal training is lacking in many training programs. Additionally, contemporary practice techniques are in a rapid state of evolution, and this is often underappreciated in many academic training environments.”

- Michael Jolly

Alexander Misono, MD, MBA, RPVI

Interventional Radiology | Newport Harbor Radiology/Hoag Hospital

Dr. Alexander Misono specializes in Vascular & Interventional Radiology and is part of Newport Harbor Radiology Associates. At Newport Harbor Radiology, he is the Chief of IR at Hoag Hospital Irvine, Director of Marketing & Business Development, and Medical Director of Vascular Ultrasound. Dr. Misono is a graduate of Harvard College, Harvard Business School and Harvard Medical School.

“I have been teaching radiology and interventional radiology to residents, fellows, and physician-extenders for years. As a trainee, I acknowledge that there is an inordinate amount of knowledge and skill that must be attained during such a limited window of time. I am devoted to ensuring that our next generation of interventionalists not only have strong fundamentals but also know all of the tips and tricks that usually can only be learned through trial and error. Because VTE has historically been undertreated and, dare I say, often mismanaged, I am very excited to help mold our future interventionalists into the best and brightest Clot Warriors!”

- Alexander Misono

Parth Rali, MD

Pulmonary & Critical Care | Lewis Katz School of Medicine
Temple University Hospital

Parth Rali, MD is an Associate Professor in Division of Thoracic Medicine and Surgery at Lewis Katz School of Medicine at Temple University Hospital, Philadelphia. Dr. Rali is the Director of System wide Pulmonary Embolism Response Team (PERT) Program and also the Chair of the National PERT consortium protocol committee. His area of interest and expertise includes Pulmonary embolism, cardiac critical care and point of care ultrasound.

Dr. Rali has more than 50 peer-reviewed publications and serves on the conference programming committee (pulmonary circulation) for the American Thoracic Society. He has recently become part of CHEST COVID-19 VTE guidelines committee and serves as Principal Investigator and Sub PI in more than 30 clinical trials with a special focus on VTE trials.

“VTE risk stratification and therapeutics have grown up so rapidly in last 10 years. It is not possible for practicing clinicians to be aware of it, and that’s where education comes into play. I firmly believe that there is an opportunity to decrease VTE related morbidity and mortality given recent advances, but key piece to achieve is raising the bar in VTE education to all practicing clinicians. Every day I look for an opportunity to educate myself and others in the ever growing field of VTE.”

- Parth Rali
